# The Art And Science Of Trial Advocacy

## Synopsis

The Art and Science of Trial Advocacy, Second Edition guides the reader through the trial process, suggesting techniques and strategies for each stage of the trial process - pretrial, trial, and post-trial motions; jury selection; opening statements; direct and cross-examination; and closing arguments. Included are illustrative transcripts explaining how to use the various techniques in an actual case, detailed guidance on the effective use of expert witnesses, and practical direction on the incorporation of exhibits and demonstrative evidence into case presentations. The book discusses basic principles of effective communication and persuasion, including the importance of the advocate's credibility and examples of how to develop case presentations that maximize the persuasive impact on judges and juries. The appendix includes the Federal Rules of Evidence. Additionally, the new Second Edition: • Recognizes how the rapid development of technology and its use in the courtroom has changed the way trials are conducted and the way lawyers present evidence and argue to the jury. • Discusses the use of technology in the courtroom. • Includes materials describing the technology now available to trial lawyers as they prepare and present evidence; and • Provides "Tech Tips" on how technology might be used to enhance advocacy at various points of the trial. Also included with the Second Edition are on-line resources to assist the aspiring or less experienced trial advocate. These online resources are available on the LexisNexis Coursebook Support Communities (CSC) Web Course for this book. The CSCs include two videotaped trials - one civil and one criminal - to demonstrate the principles being applied.

## Book Information

Paperback: 552 pages

Publisher: LexisNexis; Second Edition edition (March 31, 2011)

ISBN-13: 978-1422482230

Package Dimensions: 9.9 x 6.9 x 0.9 inches

Shipping Weight: 1.4 pounds (View shipping rates and policies)

Average Customer Review: 5.0 out of 5 stars 1 customer review

Best Sellers Rank: #593,052 in Books (See Top 100 in Books) #109 in Books > Law > Legal Theory & Systems > Science & Technology #122 in Books > Law > Rules & Procedures > Trial Practice #6267 in Books > Textbooks > Law

## Customer Reviews

The best thing about this book is that it teaches both theory and practice. It gives great examples of well done directs/crosses/closings/openings. Not only do the authors clearly and simply explain what to do but they show you how to do it and why to do things a certain way. Although the book does seem to be defense oriented it is extremely helpful for anybody who has a trial coming up or even seasoned trial attorneys looking to be refreshed. I use it for school and work purposes but I've let my supervisors borrow it when they have trial coming up. Great book, two thumbs up, I recommend.
