Rescue Technician: Operational Readiness For Rescue Providers, 1e (Lifeline)

Synopsis

This new, comprehensive curriculum for rescue operations is written by one of the premier fire training institutions in the United States the Maryland Fire & Rescue Institute. Rescue Technician goes beyond the task-specific functions of the rescue vehicle and addresses a broad-based approach to specialty training needs and shows how all units interface with one another during a rescue operation.* Covers incident scene management, current technologies, heavy vehicle rescue, and various operational issues confronting basic-level rescue providers * Practical exercises throughout provide hands-on learning and experience * Addresses NFPA Standard 1005

Customer Reviews

The book arrived sooner than i expected. My department just finished up a rescue technician class and a lot of the things that was taught was in this book.

Rescue Technician: Operational Readiness for Rescue Providers is a comprehensive teaching tool and a good reference for any personnel currently working in emergency services or aspiring to work in this profession. This manual clearly explains and teaches the topics covered by NFPA 1006 Standard for Technical Rescuer Professional Qualifications, NFPA 1670 Standard on Operations and Training for Technical Search and Rescue Incidents, NFPA 1936 Standard on Powered Rescue Tools, and NFPA 1951 Standard on Protective Ensembles for Technical Rescue Incidents. A very

good book in general. A good read.
