ICubed: The Winning Rugby Coaching System - Full Match

Synopsis

How are we going to win? No matter what your level of rugby coaching, the iCubed system will equip you to answer that vital question correctly. This book will explain all the details, the big picture of how it fits together and how to apply it. The iCubed system is unique because it identifies and then solves your three basic rugby coaching problems. With that knowledge comes power – the power to transform attitudes, focus effort, and acquire skills. So when the time comes, you will have the resources to decide with confidence how you are going to win. The rugby coach enjoys a special privilege and responsibility: to join together the efforts of everyone in the team in such a way that the total is greater than the sum of the parts. It is one of the most rewarding experiences in sport, and is one that everyone who is swept up in it will treasure for the rest of their lives. It is the reason they play, or assist, or support your team in the hope that someone will perform the magic. This book will tell you exactly how to make the magic happen. All Black and coaching great Bryan Williams contributed the Foreword in which he wrote, “through the iCubed system I learned something really important that I didn’t know before, and others have got to know about it. All rugby coaches, players, administrators, support staff personnel, and fans of the rugby will receive new and rich insights that will transform their understanding”. Even those encountering the game of rugby for the first time will understand the iCubed system with no difficulty. By the time you’ve finished you’ll know even better than many coaches how they win! Full Match is the super volume of the iCubed: The Winning Rugby Coaching System series. It gathers together all the material from the other three volumes: First Half, which revealed all the details of the system; Second Half, which provided the big picture of how the system fits together; and Extra Time, which showed how to apply the system.

Customer Reviews

Awesome read. The credibility & quality is evident, starting with a recommendation of a great All Black rugby player Bryan Williams. Kim is magic in the way he weaves & breathes new life into narratives that are already folklore but not to simply retell. He focuses on the various elements required to win. As the principles cross any competitive field, this book has helped me personally to view my own small sphere of Masters shotput in a dynamic way. I want to win & iCubed delivers.

This is a book about rugby coaching; the next level beyond drills and skills. It is written in the mould of Lore of Running. Tim Noakes explores the science of long distance running in Lore of Running by investigating the training methods of long distance running legends. In similar fashion this book tells stories of legendary rugby coaches, matches, rugby tours and series victories. It explores the philosophies, coaching strategies and approaches of successful rugby sides like the British and Irish Lions of 1971 and 1974; the 1937 Springboks and legendary New Zealand coaches like Fred Allan and Graeme Henry to mention but a few. What makes the book unique is the fact that it pulls all these strategies, philosophies, approaches and stories into a coaching model that can be used by rugby coaches on all levels. It is a wonderfully well written account of some of the great historical rugby moments of the last 100 years but moulded into an easy to follow practical coaching manual. It tells you how to become a successful coach by exploring what the legends have done. A must read for all rugby enthusiasts and every coach from wannabe coaching dads, to club coaches, to provincial and national and international coaches. Like all great books what you get out of this manual will depend on where ever you find yourself as a rugby supporter and rugby coach. You'll read it and the insights you'll gain will provide a new foundation which allow you to get more out of the

book the next time you read it.
