Psychiatric-Mental Health Nursing: Evidence-Based Concepts, Skills, And Practices

Synopsis

This editionÂ focuses onÂ evidence-based practice and rational practice with more case-oriented content that helps students better understand how to apply key concepts to practice. Plus, new illustrations, photographs, and special features actively engage students in learning and appeal to a variety of different types of learners.Â Wanda Mohr aims to empower students by the down-to-earth discussion of theory and theoretical frame-work.Â

Customer Reviews

The book was in awesome condition, better than expected and the sticker in the front had not been scratched off so i was able to register the book in my prep u account. I feel this deserved more money for that detail. The book arrived very fast and it was well protected. The book itself is super interesting , it goes straight to the point and it has many tables were you can read examples and it also comes with the nursing diagnosis (examples) that will help you understand the topic better.

Good book, not really sure what to compare it to. This was a required book for my psych nursing class. One note I want to mention is the amazing delivery. With Prime it was delivered within only 48hrs from time ordered.

Course has not started so I don't know about content. However, the book is in excellent condition and has the required codes for online resources. Very pleased with quick delivery and quality of

purchase.

Great textbook. Easy to follow and is laid out well.

Arrived on time, and as described. Low price for a great book. I recommend.

This came to me all packaged up, so I assumed it was PERFECT! I went to put the code in the PREPU site and this code has already been used. I will be calling tomorrow to speak with someone about this, as I am very unsatisfied and need to have my assignment done by the 26th (because this is an issue other students have experienced, due date was the 18th.)

The realm of psychiatric-mental health nursing is my domain. However, never have I delved into a text that was as unhelpful, bland, lacking in depth, and organized in such an awkward manner as this. I do not recommend it at all and am discouraged that it is required in some nursing curricula.

Love the style it is written in. Very easy to read format.
