A third generation tradesperson, Cauldwell is both a master electrician and master plumber. Cauldwell has an A.A.S. degree in Electronic Engineering and his books "Wiring a House" and "Inspecting a House" are popular industry standards. He is also the author of "For Pros by Pros: Plumbing."

I think this is a really good book to compliment your plumbing guide library. I've read a few plumbing books recently in preparation for a house renovation I'm about to start, and I felt like no one book had all the plumbing information I wanted. This is a good purchase though. It's not quite as complete as the author's Electrical Complete book (which I think is an essential electrical guide) but it's still worth reading/owning.

Really helpful for the home handyman. Very easy to understand and the author writes very well. Even plumbing becomes interesting. For example, I've been struggling to open up a slow draining tub in my older home. I've tried everything I could think or. Learned from the book that Pro's usually just replace the drain trap - that there really is no way to clean it out once the gunk has hardened in it - and this just happens after many years of service. So that is my next project...

Good informative book. Basics for a newby, but enough detail and advanced techniques to keep an old hand interested.

His book on electric wiring is much better.

We are building our own house and this covers everything, even drainage. And it has the best diagrams. Now I'll trust the other Complete guides.

Vague details as best, doesn't cover any one project or give you a good foundation of understanding, no better than the black and decker books

I am already working on a project......this book is helping me a lot, easy to understand. Would recommend.

my go to whenever I need a visual to follow along with my customers needs have used it often and gotten me out of uncertain situations
