Painless Earth Science (Painless Series)

Synopsis

Titles in Barron's extensive Painless Series cover a wide range of subjects as they are taught on middle school and high school levels. Perfect for supporting state standards, these books are written for students who find the subjects unusually difficult and confusing--or in many cases, just plain boring, and may need a little extra help. Barron's Painless Series authors' main goal is to clear up students' confusion and perk up their interest by emphasizing the intriguing and often exciting ways in which they can put each subject to practical use. Most of these books take a light-hearted approach to their subjects, often employing humor, and always presenting fun-learning exercises that include puzzles, games, and challenging "Brain Tickler" problems to solve. This title describes the exciting revolution in our understanding of Earth's processes and changes, focusing on movement of tectonic plates, earthquakes, volcanoes, and much more.

Customer Reviews

Painless Earth Science (Painless Series)I purchased Painless Earth Science, History, Study Techniques, Grammar, Life Science, American Government, Spelling, Pre-Algebra, & Geometry for my daughter to help prepare her for high school. She hated me for weeks, but this series has tremendously helped her with her transition from middle school to an advanced magnet academy for high school. These books are one of the best educational tools I have ever purchased. By week 2 she was excited to show me what she had learned each day. We will fortunately be using these for my son when he is old enough to use them.

I bought this for my daughter who is an eight grader to prepare her for freshman science next year. She likes the layout of the book but wished it had more quiz questions.

Good introduction to geology!

Great product, kids love it!

We love this book! Perfect for homeschooling!

This books chapters were written so that it can help you learn and keep you interested in its information it reads about.

Working out very well for our high school homeschooling needs.
