The Fateful Triangle: Race, Ethnicity, Nation (The W. E. B. Du Bois Lectures)

Synopsis

In *The Fateful Triangle* •drawn from lectures delivered at Harvard University in 1994•one of the founding figures of cultural studies reflects on the divisive, often deadly consequences of our contemporary politics of identification. As he untangles the power relations that permeate categories of race, ethnicity, and nationhood, Stuart Hall shows how old hierarchies of human identity in Western culture were forcefully broken apart when oppressed groups introduced new meanings to the representation of difference. From the Renaissance to the Enlightenment, the concept of race stressed distinctions of color as fixed and unchangeable. But for Hall, twentieth-century redefinitions of blackness reveal how identities and attitudes can be transformed through the medium of language itself. Like the â œbadge of colorâ • W. E. B. Du Bois evoked in the anticolonial era, â œblackâ • became a sign of solidarity for Caribbean and South Asian migrants who fought discrimination in 1980s Britain. Hall sees such manifestations of â œnew ethnicitiesâ • as grounds for optimism in the face of worldwide fundamentalisms that respond with fear to social change. Migration was at the heart of Hallâ ™s diagnosis of the global predicaments taking shape around him. Explaining more than two decades ago why migrants are the target of new nationalisms, Hallâ ™s prescient vision helps us to understand todayâ ™s crisis of liberal democracy. As he challenges us to find sustainable ways of living with difference, Hall gives us the concept of diaspora as a metaphor with which to enact fresh possibilities for redefining nation, race, and identity in the twenty-first century.

In this long awaited work, Stuart Hall, the invisibly Jamaican co-founder of British cultural studies, powerfully interrogates what is, simultaneously, the central dilemma of transatlantic black cultures and one of the most acute paradoxes of modern times. He bracingly confronts the persistence of raceâ and its confounding liberal surrogates, ethnicity and nationâ as a marker of identification, a fervently embraced â sliding signifierâ ™ among blacks and other formerly subaltern peoples, in spite of its scientific invalidation and horrendous past. This is a profoundly humane work that not only integrates African-American and Anglo-Caribbean cultural studies, but finds room for hope and change in the discursive nature of their subject. (Orlando Patterson)These lectures are a vital contribution to Stuart Hallâ ™s enduring vocation to find a critical voice which is, in equal measure, just and generous, reflective and transformative. Marked by struggle and sobriety, this important work makes a significant contribution to a vision of community and an ethics of solidarity. (Homi K. Bhabha)Promises to be essential reading for those seeking to understand Hallâ ™s tremendous impact on scholars, artists, and filmmakers on both sides of the Atlantic.
