Lasers: The Technology And Uses Of Crafted Light (Science And Technology In Focus)

Synopsis

Dynamic contrast-enhanced MRI is now established as the methodology of choice for the assessment of tumour microcirculation *in vivo*. The method assists clinical practitioners in the management of patients with solid tumours and is finding prominence in the assessment of tumour treatments, including anti-angiogenics, chemotherapy, and radiotherapy. Here, leading authorities discuss the principles of the methods, their practical implementation, and their application to specific tumour types. The text should be a single-volume reference that covers all the latest developments in contrast-enhanced oncological MRI.

Book Information

Series: Science and Technology in Focus

Hardcover: 162 pages

Publisher: Facts on File (October 1, 2006)

Language: English

ISBN-10: 0816047847

ISBN-13: 978-0816047840

Product Dimensions: 6.4 x 0.6 x 9.2 inches

Shipping Weight: 14.4 ounces (View shipping rates and policies)
