Hunger In History: Food Shortage, Proverty, And Deprivation

Synopsis

Hunger in History represents the culmination of two years' work in human hunger by the members of the World Hunger Program at Brown University. In bringing together original and specially commissioned articles by some of the world's leading authorities on this topic, Amartya Sen, David Herlihy, Peter Garnsey, among others, the editors have succeeded in providing a strong cross-disciplinary base for the study of hunger. The volume, which includes 16 papers, looks at the problem of hunger from the beginnings of human society, defining and redefining the problem in ancient society and again in early modern and then contemporary society, and ends with an essay by the editors on solutions to the contemporary problem of hunger.

While this book is extremely detailed and well researched, it is also incredibly boring. Purchased the book for a graduate level class on food access and we had to give presentations on various chapters. I'm glad the professor didn't make us read the whole thing. Just getting through my assigned 4 chapters was like pulling teeth. The information is great though. If you are doing research or studying anything to do with poverty and hunger, this is a great resource. But I would recommend you get it through a library. Not exactly a book you'll probably use a lot after you are done.
