Essentials Of Statistics (5th Edition)

Synopsis

Note: You are purchasing a standalone product; MyStatLab does not come packaged with this content. If you would like to purchase both the physical text and MyStatLab, search for ISBN-10: 0133864960/ISBN-13: 9780133864960 . That package includes ISBN-10: 0321847997/ISBN-13:9780321847997, ISBN-10: 032184839X/ISBN-13:9780321848390 and ISBN-10: 0321924592/ISBN-13: 9780321924599. MyStatLab is not a self-paced technology and should only be purchased when required by an instructor. From SAT scores to job search methods, statistics influences and shapes the world around us. Marty Triola's text continues to be the bestseller because it helps students understand the relationship between statistics and the world, bringing life to the theory and methods. Essentials of Statistics raises the bar with every edition by incorporating an unprecedented amount of real and interesting data that will help instructors connect with students today, and help them connect statistics to their daily lives. The Fifth Edition contains more than 1,800 exercises, 89% of which use real data and 85% of which are new. Hundreds of examples are included, 91% of which use real data and 84% of which are new. New coverage of Ethics in Statistics highlights new guidelines that have been established in the industry.

Mario F. Triola is a Professor Emeritus of Mathematics at Dutchess Community College, where he has taught statistics for over 30 years. Marty is the author of Essentials of Statistics, Elementary Statistics Using Excel, and Elementary Statistics Using the Graphing Calculator, and he is a

co-author of *Biostatistics for the Biological and Health Sciences*, *Statistical Reasoning for Everyday Life*, and *Business Statistics*. He has written several manuals and workbooks for technology supporting statistics education. Outside of the classroom, Marty has been a speaker at many conferences and colleges. His consulting work includes the design of casino slot machines and fishing rods, and he has worked with attorneys in determining probabilities in paternity lawsuits, identifying salary inequities based on gender, analyzing disputed election results, analyzing medical data, and analyzing medical school surveys. Marty has testified as an expert witness in New York State Supreme Court. The Text and Academic Authors Association has awarded Mario F. Triola a "Texty" for Excellence for his work on *Elementary Statistics*.

Unfortunately this book is used in stats class. This book is filled with nonsense and does not make any sense. The wording and explanation (if any) are unclear. Worst of all, in a solution to a problem in an example. It states "by using technology" does not show how to punch it in.

This book was required for my statistics class. There are many problems and examples that can be pulled from this book for practice and reviews. I mainly used the last few pages because they contained useful charts like z- and t-score tables.

Decent book. Uses a bit outdated technology and references in word problems, but overall easy to understand.

Really doesn't explain with enough clarity. This book gets lost in its own inability to convey the complex topics of statistics. In all fairness, I did not use the CD. Thought I had rented this book, I will definitely be donating it. I cannot recommend this book.

Rental experience was top-notch and I will do it again! The text book itself attempts to be thorough for the topic, but I've seen lecturers present the same information, in a better way with nothing more than a whiteboard...

I rented this book online and the back 1/4 of the book must have gotten wet because it was all black and molded. It's readable, but I figured I would get something a little nicer.

Great book. Helped me a lot when I am studying. Thank you!!!

Some of the chapters were falling out but it did the job.
