Customer Reviews

Grade 1-3-- Adler makes Jefferson accessible to young children in this new addition to his biography series. In the brief text, he covers the main achievements and events in Jefferson's life and portrays him as an intellectual, inventor, lawyer, architect, and statesman who disliked presidential pomp. He mentions that, although opposed to the idea of slavery, Jefferson owned slaves throughout his life and several are depicted in the illustrations. Adler's writing is clear and objective, free of fictionalization, and easily read. It will also serve as a read-aloud. The format is attractive; each double-page spread contains a framed painting with short paragraphs superimposed on the illustration. The Wallners' charming watercolors include many details that show the furnishings, clothing, and daily life of 18th-century Virginia. Easier to read than Smith's *Thomas Jefferson* (Messner, 1989), the book is an informative introduction to this prominent American leader. --Jean H. Zimmerman, Willett School, South River, NJ

David Abraham Adler (born April 10, 1947) is the author of nearly 200 books for children and young adults, most notably the Cam Jansen mystery series, the "Picture Book of..." series, and several acclaimed works about the Holocaust for young readers. Adler was born in New York City, New York. He graduated from Queens College in 1968 with a bachelor's degree in economics and education. For the next nine years, he worked as a mathematics teacher for the New York City Board of Education, while taking classes towards a master's degree in marketing, a degree he was awarded by New York University in 1971. In that same year, a question from his then-three-year-old nephew inspired Adler to write his first story, *A Little at a Time*, subsequently published by Random House in 1976. Adler's next project, a series of math books, drew on his experience as a math teacher. In 1977, he created his most famous character, Cam Jansen, originally featured in *Cam Jansen and the Mystery of the Stolen Diamonds*, which was published that year. Adler married psychologist Renee Hamada in 1973, and their first child, Michael, was born in 1977. By that time Adler had taken a break from teaching and, while his wife continued her work, he stayed home, took care of Michael, and began a full-time writing career. Adler has three children and one grandson. He lives in Woodmere, New York. Alexandra Wallner has written and illustrated a number of books about famous literary and historical figures, including *An Alcott Family Christmas* and *Beatrix Potter*. She lives in Maine with her husband, illustrator John Wallner. John Wallner has illustrated many titles in David A. Adler's *Picture Book Biography* series. He lives in Maine.

We loved the book. It gave more information than I expected. :)

Great seller, fantastic product! Thanks!

School book

I thought it was a good amount of information for my kindergarten class. I did skip over the part about slaves, though. They are too young for that concept.

I ordered this as a replacement for the missing copy in our classroom.

This Book explains the life of Thomas Jefferson. It starts out explaining how his father died when he was very young, leaving him the man of the house and with a lot of responsibilities. The book also

explains how Jefferson always loved reading and decided that it would be good to go to college for law. He was the person who wrote the declaration of independence and was the secretary of state for George Washington. He also served two years as president himself and established the University of Virginia. The book also tells how upset Jefferson was when he lost his wife and daughter. I liked this book because it told about Jefferson's life in a way that wouldn't bore children. It was really colorful and it was fairly easy to read. It is a book that children could pick up and really get into where as other biographies might just be boring and something children would only read when they had too. I think that the message this author is trying to send out is just what an important person Jefferson was. It seems that he really wants children to be able to get into books with biographical context and not find the subject to be dull and boring. The book also has the pictures that really jump out at you which children really love.

Adler does a superb job in the "A Picture book of..." series. The book has lots of biographical information but presented in such a manner that young students will not be bored. Great illustrations on each page give little ones lots to look at while listening. The book concludes with a timeline of important dates. Good resource material for grades K-3 as an initial introduction to key people in US history.

Fast shipping. Product was as described.
