in Kindle Store > Kindle Short Reads > 15 minutes (1-11 pages) > Business & Money #272

in Books > Business & Money > Processes & Infrastructure > Purchasing & Buying

Customer Reviews

This is basically a list of twenty-six different websites you can visit to hopefully buy stuff at a discount online. However, this book seems to leave out a lot of information to be desired. Sure, it might contain the author's personal list of best resources, but the author has chosen not to elaborate on any of the items. This means that it does not tell you why the particular website is good, or what particular products are good items for resale. Here's one example: "eBay" is a "very popular online auction site". I find that this list clearly lacks helpful and useful information. I skimmed through the list, and felt that this book did not really guide me towards the goal of suggesting what products should be bought online. The descriptions are too broad to be of any real help or

instruction to the reader. At least this book was short and organized so it was easy to skim through. Otherwise, I find that this book offers little to no useful advice. I would recommend looking elsewhere if you want to learn how to save money.
