## Customer Reviews

Using the task analysis section in the back of the protocol booklet is super helpful! Just a tip to my fellow graduate students of ABA out there!

I consult for families of young children with various developmental delays and disabilities, and I have found that using the VB-MAPP has helped me to create the most effective and relevant program in terms of teaching these children skills that will replace challenging behaviors, which are often the result of these skill deficits. EXCELLENT assessment!

I am looking to applying this in the classroom curriculum next year once staff training is complete. This is great curriculum for a special education classroom.

Great assessment and a great price

I had to have this for class, but after using it in class with students, it really is a helpful place to start in figuring out IEP goals alongside the state standards.

I am using this product on a day to day basis with my clients and am very pleased with the information I am gaining from it. It is a necessary resource for creating and implementing effective treatment plans.

I think is a complete language and social skills assessment program for Behavior Analyst!Great work!

Love this! Affordable and useful.
