State Of Emergency: The Third World Invasion And Conquest Of America

Synopsis

Pat Buchanan is sounding the alarm. Since 9/11, more than four million illegal immigrants have crossed our borders, and there are more coming every day. Our leaders in Washington lack the political will to uphold the rule of law. The Melting Pot is broken beyond repair, and the future of our nation is at stake. In this important book, Pat Buchanan reveals that, slowly but surely, the great American Southwest is being reconquered by Mexico. These lands---which many Mexicans believe are their birthright---are being detached ethnically, linguistically, and culturally from the United States by a deliberate policy of the Mexican regime. This is the "Aztlán Plot" for "La Reconquista," the recapture of the lands lost by Mexico in the Texas War of Independence and Mexican-American War. Comparing the immigrant invasion of America from across the Mexican border---and of Europe from across the Mediterranean---to the barbarian invasions that ended the Roman Empire, the author writes with passion and conviction that we have begun the final chapter of the Death of the West. Unless the invasion is halted now, Buchanan argues, by midcentury America will be a country unrecognizable to our parents, the Third World dystopia that Theodore Roosevelt warned against when he said we must never let America become a "polyglot boardinghouse" for the world.Â President Bush's failure to halt the invasion and secure America's border, Buchanan writes, is a dereliction of constitutional duty that, in other times, would have called forth articles of impeachment. In the final chapter, "Last Chance," he lays out a sweeping immigration reform and border security plan, which, he contends, if not pursued, means George W. Bush's legacy will be to have lost for America a Southwest that was the legacy of Sam Houston, Andrew Jackson, and James K. Polk. With an estimated ten to fifteen million "illegals" already here and tens of millions more poised to pour across our borders, few books could be as timely---or important---as *State of Emergency*. It is essential reading for all Americans.

Book Information

Hardcover: 320 pages

Publisher: Thomas Dunne Books; First Edition edition (August 22, 2006)

Customer Reviews

In his wide-ranging argument about immigration, perennial wake-up-caller Buchanan finally seems a little despondent. The West is nearing death by drowning under a torrent of non-Westerners, the preponderance of whom, he insists, are just trying to earn more and live better than they did in their countries of origin. Some few are bad actors, but they would be manageable if the total number of immigrants were much smaller. Crucially exacerbating the crisis are attitudes fostered by original homelands and others neglected by host nations. For example, Mexico, with its permanent, inalienable citizenship and historic grudge against the U.S. for the latter's Mexican War-facilitated purchase of half of Mexico's original territory, actively discourages Mexicans in the U.S. from becoming U.S.-identified. Simultaneously, U.S. elites downplay "Americanization" in favor of transforming most of the populace into a low-wage workforce fragmented by linguistic and cultural differences. Look to Europe, which from Britain to Russia, Buchanan argues, is much nearer cultural collapse, to see the U.S. in 2050--or sooner. Ray OlsonCopyright © American Library Association. "The one absolutely certain way of bringing this nation to ruin, of preventing all possibility of its continuing to be a nation at all, would be to permit it to become a tangle of squabbling nationalities," said Theodore Roosevelt. State of Emergency will demonstrate that this is exactly what is happening to America and may now be unstoppable. The United States of 1960 was a First World nation, 90% of whose people traced their ancestry to Europe, 97% of whom spoke English. We studied the same history and literature in school, went to the same movies, read the same books, listened to the same radio and TV, cherished the same heroes. We were one nation and one people. That America is dead and gone. The deconstruction of America -- along the lines of culture and values, language and faith, allegiance and loyalty -- has begun. By 2050, Americans of European descent will be a minority in the United States. One hundred million Hispanics with ties of language and loyalty to Mexico and Latin America will be living here, concentrated in the Southwest. It is the thesis of State of Emergency that the Melting Pot is broken beyond repair, that assimilation and Americanization are not taking place, and that only action is to seal and secure

America's borders to halt the flow of over a million legal and illegal immigrants a year, and to begin the Americanization of the tens of millions of aliens in our midst can save America. Our civilization cannot survive indefinitely what is going on. A State of Emergency reveals who is doing this to us, why they are doing it, why this is our last chance, and how, if the will is there, we can yet save America from Balkanization and break-up. --This text refers to an out of print or unavailable edition of this title.

I had already read *Suicide of a Superpower*, which I can also highly recommend, and so some of the arguments Buchanan puts forth in relation to the effects unrestrained immigration on the West in general, are familiar to me. However this book explores the nature and consequences of the wholesale movement of third world populations into first world nations with declining birthrates, in much more depth and the results are truly frightening. The accelerated pace of radical change in these countries over the last three decades has been completely contrary to the wishes of the majority and no-one is even discussing such a transformative phenomenon, much less analysing its effect on white anglo culture, traditions or society. After reading this book, with its calm and reasoned arguments, Buchanan's invigorating common sense is so refreshing and 'adult' after all the childish BS we are fed on a daily basis by the political and cultural elite. When almost every institution and significant person of 'authority' in our society, is telling us over and over again about how wonderful and positive diversity is, it is unbelievably empowering to find that you are not the only person out there who has not signed up to the 'diversity is 100% positive' club. I recommend this book, and others by Buchanan, to anyone who is interested in hearing the 'truth of things' and not some twisted and sanitised version of the truth that is the main fare we get from the MSM. As Buchanan's book makes abundantly clear, we are now past the point of no return, with the West continuing to sleepwalk its way to utter disaster and ruin. I would also recommend that you all read his books, and others like him, as quickly as you can, because believe me, the day is definitely coming, and probably sooner than you think, that books like this one will be banned and men like Buchannan will be nothing but a memory of an altogether happier past. Make the most of him while you still can.

This book is an eye opening account of the future of America if the current trend in immigration (both legal and illegal) continues. Buchanan takes on every argument of both the radical right and the radical left and smashes every one of them. This book will not be taken kindly by the disciples of political correctness as Buchanan pulls no punches in laying out the sad facts. He rebuts the myths

of "We are a nation of immigrants" all the way to "Diversity is our strength" by pointing out falsehoods that are propagandized by the proponents of mass immigration. He takes on the leftist elite ideologues who have a self hatred of anything American to the big business elites who want a pool of cheap labor to maximize their profits. He reveals the irony of African-Americans backing of the Democrats at all cost when that party has done the worst to affect their lives since African-Americans are those most adversely affected by competition for jobs by immigrants. He points out through facts how England, France, and much of Europe are reeling in problems due to their own flawed policies of forced "multiculturalism" through third world immigration. Especially interesting is the leftist idea of America being a "creed nation", bound simply through principles and ideals, as opposed to culture, language and kinship. He compares that to the former Soviet Union, whose creed of communism wasn't enough to hold together that nation which is now 15 separate nations broken up according to ethnicity and "culture". He also points out the former Yugoslavia and numerous other examples of groups of people who do not want to be forced to live with others of another "culture". Another great point made by Buchanan is the Mexicanization of the southwest United States which is transforming the very nature of life in that part of the country. Also telling is how traditional "Western" peoples are being out-bred in population numbers which is causing a radical transformation in many other western nations. Finally he describes the continued failure of the US government to secure our borders especially in view of the fact that we have our military securing the borders of OTHER nations (Korea, Iraq)!!! The surprising truth is that a huge majority of all Americans (both native and immigrant) feel that the US is failing in its constitutional obligation to its citizens by its complete apathy to border security!! This should be mandatory reading for every American!!!!

Patrick Buchanan is a controversial conservative figure who has drawn criticism for many of his works. However, of some of the more activist of conservative authors, his works are perhaps the most researched and reasoned I have read in a long time. In "State of Emergency" Buchanan gives a strong historical and social argument for securing our borders. With one exception cited in the next paragraph there is almost no ranting and raving on the lunatic fringe -- consider that the next time you read an Anne Coulter book -- but a well reasoned, intellectual argument for why we must protect our borders and preserve our culture. The only negative is I do not agree with his assessment that President Bush's immigration policy is grounds for impeachment. Although I am a fan of the president -- yes, the man still has supporters -- I disagreed with some of his efforts at immigration "reform". However, I do not agree that his immigration policy goes to the level of

treason.
