Tony Koester has written a half-dozen books focusing on his life-long hobby of model railroading. Tony is the editor of Model Railroad Planning, a special annual issue of Model Railroader magazine, as well as a contributing editor to Model Railroader. He writes Model Railroader magazine's popular Trains of Thought column and has written numerous feature articles for Model Railroader. He also served as the editor of Railroad Model Craftsman magazine until 1981. Tony spent a quarter of a century designing, building, and with his friends, operating a freelanced coal-hauling HO railroad, the Allegheny Midland (the Midland Road). More recently, he has been hard at work on a multi-deck HO layout that accurately depicts the Nickel Plate Road's St. Louis Division as it appeared in 1954.

A great booklet to have in your portfolio of help books

This is one of the most insightful and helpful books I have read on the subject of layout planning. Focusing on several layers or levels in creating a model railroad, Koester gets into many related topics and discussions. After first borrowing the book through my public library and realizing how

helpful it would be, I purchased the book for myself. It's now with my brother, who is in the process of creating layout space in his basement. I highly recommend this book!

Needs more specific details about how to build multi decks (helix, grades, etc.). Nice pictures and stories but few "beneficial" construction details.

Not what I was hoping for.

Great book with lots of good ideas and photos. A decent book at a decent price.

It has helped me to understand one way to build a multi deck layout track and how to get the trains from one train track to another. I'm very excited about getting started, but would appreciate even more information of the layout and construction of a multi-deck layout.

Excellent exploration of the topic, that has persuaded me that it is the way to go.

Good book.
