No Natural Weather: Introduction To Geoengineering 101

Synopsis

Once upon a time, all over the world, we saw fluffy white clouds in a blue sky. Today we see white lines and streaks, and many of us, in many countries, live under a layer of white haze. Children no longer know what real clouds look like, as the three basic cloud types are no longer seen.

Remember the high-altitude cirrus, feathery and white, made of ice crystals? I have not seen real cirrus clouds for 15 years. What occurs now is what NASA calls "man-made cirrus" or "jet cirrus" – an actual admission of something unnatural and artificial. "No Natural Weather" is a clearly written simple tutorial about weather modification and much more, designed for newcomers to the concept, but also full of explanations and clarifications that will add to the research of those who are already aware. Start at the beginning and let this narrative take you on a journey from soup to nuts, A to Z. Share the series with your family and friends! There is no better time than now to educate yourself to what is and has been going on, and the thoughtful guidance provided by this seasoned researcher is the best company you could have on such an alarming journey. For yes, it is alarming to learn that our planet is being altered in ways that it may never recover from. It is time for us all to voice our collective power, but no one can do so until the actual knowledge has been given and shared. Thank you, WeatherWar101, for your immense contribution! Sofia Smallstorm -

Customer Reviews

This is an amazingly simple to read book that gives you the truth about what's really going on with our weather. I'm not new to Chemtrails and weather manipulation, and with this book I now understand Rapid Evaporation and NexRad. You will learn the root cause of weather manipulation. This book is a must read for those who want to help make a difference.

Excellent and informative book, everyone should read this...

Simply put detrimental information that cannot be disputed. Not only exposing the problems and causes, but also part of the solution while encouraging others to do the same - That alone leads me to know this to be absolute truth. To that end, Thank You WeatherWar101, at the present moment, you're our only hope!!

We are all witnesses to the ongoing Geo-engineering programs that are taking place around the world. This first eBook in a series explains in simple terms how we got to this point and what you can do to help raise awareness to this ongoing crime against humanity.

Interesting book. Not sure about the science though.

Awesome book. Every one needs to look at this! Can't argue with the documentation. It's a truth hard to accept but the argument has no holes. Buy it and watch all the videos in the play list.

I have been a follower of your work for over a year now and I commend your continuing efforts in educating our peers about this assault on the planet. This eBook educates readers about the facts of what is going on in the skies around the world. Real science, real manipulation, real results. WW101 lays the facts out perfectly time after time and urges the reader to think critically about the reality we live in. An extremely important piece of reading material that will change our understanding of the world we know.

great info.
