Practicing Environmental Law (University Casebook Series)

Synopsis

As a part of our CasebookPlus offering, you'll receive a new print book along with lifetime digital access to the downloadable eBook. In addition, you'll receive 12-month online access to the Learning Library which includes quizzes tied specifically to your book, an outline starter and three leading study aids in that subject and the Gilbert & Truitt® Law Dictionary. The included study aids are Environmental Law and Policy (Concepts and Insights Series), Environmental Law (Concise Hornbook Series) and Environmental Law in a Nutshell. Practicing Environmental Law brings the excitement of environmental law practice into the classroom. The book covers the traditional subject matter of an environmental law course, but in a new way. Each chapter includes multiple case study-style problems, which confront students with an environmental problem and a range of supporting materials. As students work through the book, they will develop an environmental justice advocacy strategy, decide whether to bring novel Clean Air Act litigation to address climate change, consider whether fireworks displays are point sources of water pollution, assess whether the Army Corps of Engineers must prepare an environmental impact statement for a new utility line, negotiate an enforcement settlement, and negotiate the contents of a landscape-scale habitat conservation plan—among many other exercises. They also will review, and use, affidavits, administrative orders and guidance documents, biological opinions, white papers, letters, and other document types, in addition to many statutory and regulatory excerpts and court cases. In short, they will simulate the work that environmental attorneys actually do. The casebook, along with the accompanying online self-assessment questions written by the authors, will teach you the basics of environmental law, and also help you gain deeper understanding of, and heightened enthusiasm for, a crucially important legal field.
