Eclipse Miracle: The Sun Is The Same Size As The Moon In The Sky

Synopsis

Did you know that the Sun and the Moon appear the same size in the sky? That's because the Sun is 400 times bigger than the Moon, but also 400 times farther away. It's been called "the great coincidence," but is it really just coincidence? Learn secrets of the Sun and Moon, and get a front-row seat as they line up to show us the amazing eclipse miracle! For all ages with 8 page science section."A wonderful book by Sand Sheff, with great scientific and spiritual content for all ages and backgrounds (with the [very] occasional Bible verse being quoted alongside academic references). The message is powerful, the story is great, the science is 100% accurate, and the author has done a masterful job of mixing the scientific facts with the wonderment and special nature of total eclipses. The book is educational, enlightening, and uplifting in a way that is difficult to explain to someone who sees only the mathematics of the event. HIGHLY recommended!-"--Dan McGlaun Eclipse 2017.orgIt has to be one of the most beautifully presented stories for children! It contains science for beginners, geography, God lessons and how to overcome fear...Everything!" Dr.Katina Michael editor-in-chief IEEE Technology and Society MagazineEclipse Miracle takes the reader on a trip through the solar system and across the planet to offer an inspirational and informative take on the sun, moon, the earth and the phenomenon of solar eclipses. There is an amazing, yet not widely known, cosmic arrangement visible from Earth. The Sun and the Moon appear the same size in the sky. This occurs because the Sun is both 400 times bigger than the Moon and also 400 times further away! This is why we can have perfect solar eclipses like we do. Literally, the moon goes in front of the sun and covers it perfectly. People become excited when they reflect upon this truth, and children really think it's cool. The book credits God for this, but in a non-denominational inclusive way. It also has an 8 page science section in the back which older kids and adults like. What makes this book different: Eclipse Miracle focuses on the amazing truth of the sun/moon alignment. The book is colorful and not dated "2017." It's message and story will continue to be fun and relevant after the eclipse.

Customer Reviews

"It has to be one of the most beautifully presented stories for children! It contains science for beginners, geography, creation and God lessons and how to overcome fear...EVERYTHING!"

Professor Dr. Katina Michael, editor-in-chief, IEEE Technology and Society Magazine

Sand Sheff is a musician, hay farmer and elementary school music teacher in the Four Corners USA. This is his first illustrated book.

My wife and I got this book for our friends daughter and she loved it! The art is beautiful , colorful, and flowing and the story so well simply and poetically explains the Solar Eclipse Miracle for adults AND for children. This as not only lovely, but highly educational and just plain fun. It's hard to believe this was written and illustrated by a simple Cowboy. I HIGHLY recommend this Amazing book!

This is a very sweet story with much to teach in an easy and gentle fashion. The author provides a poetic rhythm that makes it great to read aloud and people of all ages will enjoy hearing and reading it to one another. It would be the perfect story to memorize for your children so that you could recite it at night wherever you may be.

The book was really cute. I got it for my grandson but it was a little young for him. He is 9yrs old
